Hey Ken,

Thanks for the reminder. We do have the official version in hand, but hadn't worked with our website people to replace. Doing so in the next day.

Andy Chang, M.S.

Andy,

FYI - I just noticed one other problem with the round 2 submittals page. The state recommendation for Missouri is not the state's final recommendation. It is the version it held its public hearing on in August, which included two potential options for the Labadie plant in Franklin County. Only the state's chosen option for Labadie was included in its final recommendation, which was submitted to EPA about a month later. I'm sure EPA has it, but the final recommendation is on the state's boundary designations web page (<http://dnr.mo.gov/env/apcp/naaqsboundarydesignations.htm#SO2>).

Regards,

Ken

Hey Ken – 3 enclosures for you with the modeling reports for the impacted sources in Nebraska.

Thanks, Andy. The NDEQ cover letter states that Nebraska City and Gerald Gentleman model attainment of the NAAQS, so it seems that there should be modeling reports for those sources too. However, the letter doesn't specify what the enclosures were other than the Sheldon Station consent decree, so I can't say for sure that they were submitted to Region 7.

Regards,

Ken

Hey Ken,

These should be the right documents for Nebraska. They're for Sheldon Station. Let me follow

up with the Regional contact to see if they got additional info about either of the other sources in Nebraska subject to the July 2, 2016 court-ordered deadline (Gerald Gentleman and Nebraska City Station)
